

# Memo

**To:** Our Valued Customers  
**From:** USALCO  
**Date:** March 16, 2020  
**Re:** Coronavirus (COVID-19)

---

USALCO is continuing to monitor the coronavirus (COVID-19) developments very closely.

We have two main concerns currently: the health and well-being of our employees, customers and their families and the continued service and supply of materials to our customers.

To that end, please rest assured that USALCO has put into place the appropriate safeguards at all our facilities. We have worked closely with our raw material suppliers to ensure continuity of all raw materials. We have contingency plans in place for operations at all 9 of our plants as well as alternate transportation options if needed.

USALCO will continue to monitor this fluid situation to ensure we are making timely decisions and taking the necessary actions.

We thank you for your support during this time and will provide additional updates if needed.
